Emergency Evacuation Plan for People with Disabilities:

1. Some people with disabilities may not want assistance.

In such cases, the fire warden should alert the fire department to their last known location.

2. For those who do want assistance, below are some suggestions:

a) People who are unable to walk - If located on an upper floor, the employee may be assisted to a stairwell landing to await evacuation or further instructions by fire department personnel. It is important that the co-worker or "buddy" who is assigned to the person with the disability stay with the person until the emergency is over or insure that the person with the disability is provided with a walkie-talkie, and, is capable of using it.

b) People who can walk with assistance: These employees may not be able to travel to a safe area quickly. A co-worker or "buddy" may be designated to assist and accompany the person in descending the stairs in the event additional help is needed, or the individuals may choose to wait in a stairwell for fire department personnel to assist them. It is important to inform the fire department personnel of this decision. Someone should be assigned to stay with this person until the emergency is over, or, insure that the person with the disability is provided with a walkie-talkie and is capable of using it.

c) Visual Impairment: Those individuals with poor vision or no vision may not realize the extent or location of an emergency, and may walk into unexpected objects in paths of escape. An employee with a visual impairment can proceed down the stairs with minimal assistance from a sighted coworker. The individual may prefer to hold on to the sighted person's elbow and walk a half-step behind. Someone should follow behind to protect the employee from being pushed down in the event of crowding. It is best if someone remains with the employee until the emergency is terminated.

d) Deaf or Hard-of-Hearing: Deaf and hard-of-hearing individuals may not be able to distinguish audible warning alarms or respond to voice communications. They may be able to see a visual alarm; if so, they should be able to evacuate with the other employees. If there is no visual alarm nearby, personal notification in the form of sign or hand gestures will be necessary. It is especially important that the floor warden check in restrooms, copy rooms, and kitchens in case an alarm may not be seen from that area. To get the attention of deaf or hard-of-hearing employees, flick the room light switch on and off to convey the need to communicate.

Evacuation Procedure for People with Disabilities:

1. The floor warden must know the whereabouts of every person with a disability who is in the work area and know who that person is.
2. Each floor warden shall designate an assistant and an alternative to assist the person with the disability to the secure stairwell.
3. Before leaving the person with the disability and the co-worker/buddy in the area of refuge, the floor warden shall give the person(s) a walkie-talkie set.
4. If the person with disability is capable of operating the walkie-talkie, the coworker/buddy may choose to proceed out the building to the assigned meeting area.
5. The floor warden shall keep the other walkie-talkie for communication with the person(s) in the area of refuge.
6. The safety supervisor and the floor warden shall descend the stairwell making sure all the doors in the stairwell are closed.
7. The floor warden shall exit the building and shall notify the fire personnel where the persons with disabilities are located in the areas of refuge
